# Web3 is a P2P protocol between websites

- The web3 we proposed here is not IPFS in ethereum ecosystem. Web3 should not be based on any party's platform. Otherwise it will become another version of centralized website in the name of decentralization.
- The eternal file system?
  - The idea of IPFS comes from distributed file system, like Emule, combined with github's version management method. But files on emule are mostly IP violated and not important, like movies! So it is seldom for people to store important data on emule like distributed file system.
  - Everything comes at a certain price, we still have to save important data on reliable disk and pay the storage fee every month.

Upload your file to the decentralized cloud, all you have to pay is the gas fee, and someone will save it for you eternally. Wow, really?! Is it safe?

Global mRNA genetics, global mindcontrol

**Brain wave! AI brain control! 두뇌 제어**  
**그들은 우리의 두뇌를 읽고 있습니다**

**They read our mind, Influence our emotion**

**Even control body movement when kidnap**

**We need decentralization:** [www.decensormedia.org](http://www.decensormedia.org)

B/AI brain-controls A :

**Military**군사 수준 **VS** **Commercial**상업 급료

B can  
1. read A's mind  
2. influence his emotion  
3. control his body movement

# Global mRNA genetics, global mindcontrol

**you don't hear this from the mainstream media, because big figures are mindcontrolled! They will be facing lawsuit and in big trouble, even life danger if they go against the dark shadow!**

**Mindcontrol is far beyond just reading your brain knowing your secret and set a trap for you, so they have some evidence to make you end up in jail for thousand years long!**

**To be honest I still feel like in a dream to realize that they are so mad to inject uniform-slavery-control gene into our blood and our offspring's blood!**

**We see many many cases of people dying from heart problem, these are live feedback test and warning signals as well ! Because our information is severely censored, many accounts are shut down for talking about the dose! So you should smell something familiar ! NO body has the right to silence anybody in the name of love or their justice standard! Only they are afraid of something or try to hide something ugly!**

**Remember one very basic physics: light is electromagnetic wave! If they can control mouse's sex intercourse desire with a beam of light, they can also control our heart and many other organ with a beam of electromagnetic wave!**
